ABOUT US

A highly experienced team of lean-sigma black belts with over 40 years combined industry experience in the areas of training, mentoring and hands-on project facilitation. We have a passion for providing workshop-based training modules that ensure trainees remain engaged and get hands-on experience before leaving the classroom. We love to roll up our sleeves and work hand in hand with your teams to make step improvements in quality and productivity.

We can also provide advice as to whether KT-Pulse is right for you and your business. KT-Pulse is our innovative technology that measures productivity in manual assembly operations much more effectively and efficiently than traditional manual, paper-based systems
